Abstract

Today, world is facing a great problem related to Environment. This is a matter of concern for people all over the world. People are becoming aware of various problems like global warming, ozone layer depletion, pollution of air and water and so many. We have been gifted with many resources but due to our irresponsible attitude, we are using these resources very carelessly which has caused immense damage. But now awareness and concern for environmental issues are growing all over the world. Lack of education results in over exploitation of natural resources. We must save the resources judiciously for our future generation. It is the responsibility of each and every person to protect the environment. For overall development of a student we must inculcate good habits to save environment and use then resources like water, paper, and electricity wisely.

Key words

- Global warming
- Natural resources
- Pollution
- Conservation
- erosion

Main paper

“We generate our own environment. We get exactly what we deserve. How can we resent a life we have create ourselves? Who is to blame, who’s to credit but us? Who can change it, anytime we wish, but us?”
Richard Bach

“it is not pollution that’s harming the environment. It is impurities in the air and water that are doing it.”
Dan Quayle 1947 American politician

A major purpose of teaching is to develop good habits, especially at growing age. We used new techniques and strategies to teach them about the topic. Students at the tender age of primary classes enjoy the lesson through various activities and technologies. So it is very important to teach them through the strategies of their interests. It can be having through classroom activities, field survey, and internet access PowerPoint presentations, poems and articles etc.

TOPIC --NATURAL RESOURCES AND OUR ENVIORNMENT

LEARNING OBJECTIVES

- To familiarize the students with the surroundings and bring the sense of care and responsibility.
- To inculcate the habit of using resources judiciously.
- To develop the habit of keeping the environment pollution free by planting more and more trees
- To realize the importance of nature
- To develop the habit of recycling of various sources like paper.

HANDOUTS AND AIDS

- CDs related to effective use of resources like water, paper
- Poetry related to environment.trees, water etc

TEACHING METHODOLOGY

- PowerPoint presentations
- Audio visual aids
- Newspaper articles
- Internet information

PRESENTATION

CONTENT

- Natural resource water, forests, soil
- Importance
- Problems crated due to pollution,deforestation,erosion
- Conservation of the natural resources
- Necessity of healthy environment

INTRODUCTION **Reciting a poem**

NATURE OUR MOTHER EARTH

Mother Nature treated us as an infant,
We started living in tents,
Ach and every moment she cared for us,
And we as our transport prepared a bus
She gave us food, we took hr wood,

Think

If she made rain for us.
She put caves in front of us,
If she made the hottest sun for us,
She put bushy trees in front of us.
She made a beautiful night,
But we human beings always want to fight
She gave us lot, but we have given her what,
Answer will be nothing
But we can try for something
She will; be satisfied with every thought,
Because she is our mother,
Don't let your mother cry
To make her happy best you try.

- A discussion will be held on what the nature has gifted to us.
- How we are destroying the environment?
- Why and how should we preserve it?

TEACHER ACTIVITY

- Lesson will be taught using different CDs of natural resources like water, forests, soil
- Power point presentations
- Internet information
- Newspaper clippings and articles
- Poetry and songs

STUDENT ACTIVITY

- Collection of articles from different sources like magazines, newspapers etc.
- Participate in festivals like Vanmahotsav
- Nukkad Natika
- Write a poem or an article like

ENVIRONMENT

Health depends upon environment,
Wealth depends upon environment
We ourselves depend upon environment
Then why we are polluting
Our own environment
If we keep our environment neat and clean.
.nothing would harm us and
We will get fresh air from trees
free from germs and also diseases
So, the point is very simple that,
Keep your environment neat and clean,
So that coming generation can live and be happy.

ASSESEMENT

- Worksheet
- Slogan writing
- Poster making
